

Our services

Supernova Horizon is a pioneering space tourism company dedicated to unlocking the wonders of space travel for a wider audience. We offer transformative experiences that transcend the Earth's boundaries, igniting awe and wonder while pushing the boundaries of human exploration. Whether you crave the adrenaline rush of a suborbital flight or the serenity of an orbital adventure, Supernova Horizon has the perfect journey for you.

Weightless wonders

Our suborbital flights offer a taste of space, propelling you to the edge of the atmosphere aboard our sleek, reusable spacecraft. Buckle up and feel the g-forces as you ascend, then experience the exhilarating moment of weightlessness – a feeling beyond description. Gaze out the panoramic windows and witness the breathtaking curvature of our planet set against the inky blackness of space. This unforgettable 15-minute flight is the perfect introduction to space travel, leaving you yearning for more.

Celestial majesty

Embark on a multi-day orbital adventure and truly live amongst the stars. Our luxurious spacecrafts boast expansive viewing areas, providing unparalleled vistas of our home planet in all its breathtaking beauty. Watch sunrises and sunsets paint the horizon with vibrant hues, and marvel at the intricate dance of clouds swirling across the land. Float freely within the cabin, experiencing the liberating sensation of weightlessness on a longer scale. Engage in scientific experiments, participate in educational talks, or simply relax and soak in the awe-inspiring panorama. Our orbital missions range from 3 to 7 days, catering to varying levels of time commitment and adventure.

Leave your mark

Be among the pioneers of a new era as you join our lunar voyages. Step onto the dusty plains of the Moon, marking your footprint on celestial soil and making history. Explore iconic lunar landmarks like the Sea of Tranquility and Apollo 11 landing site, marveling at the desolate beauty of our closest celestial neighbor. Our multi-day lunar missions combine guided exploration with independent time, allowing you to experience the Moon at your own pace. Be part of a select group of individuals who have shaped the future of space exploration, leaving an indelible mark on the lunar surface.

Among the stars

Take your space odyssey a step further with our space station stays. Partner with us to secure your place aboard a private space station, where you can experience the thrill of living and working in orbit for weeks or even months. Conduct scientific research, collaborate with astronauts and professionals from around the globe, or simply enjoy the unique perspective of Earth from an orbiting outpost. Immerse yourself in the routines and challenges of life in space, pushing your personal boundaries and contributing to the advancement of humanity's spacefaring endeavors.

Craft your dream

At Supernova Horizon, we believe that space travel shouldn't be limited to pre-defined packages. That's why we offer custom experiences, catering to your unique vision and aspirations. Do you dream of witnessing a solar eclipse from space? Are you driven to conduct specific research experiments in microgravity? Our team of experts will work alongside you to design a personalized space travel itinerary that fulfills your wildest dreams. From mission duration and activities to crew selection and training, we'll collaborate closely to ensure your journey is truly your own.
