

Meet our team

Our success is driven by a passionate and dedicated team of individuals, each with their own unique expertise and unwavering commitment to making space travel a reality for everyone. Here are just a few of the key players who will be instrumental in making your space dreams come true:

Amelia Sharma
CEO & Chief Engineer

A visionary leader with a Ph.D. in Aerospace Engineering, Dr. Sharma has spent her career pushing the boundaries of space technology. Her innovative designs and unwavering dedication to safety have been instrumental in making Supernova Horizon's spacecraft the safest and most advanced in the industry.

Kai Tanaka
COO & Head of Development

A charismatic and strategic entrepreneur, Mr. Tanaka brings a wealth of experience in building successful ventures to Supernova Horizon. He is responsible for forging key partnerships, securing funding, and developing innovative business models that make space travel more accessible and affordable.

David Zhang
Chief Medical Officer

A renowned physician with extensive experience in aerospace medicine, Dr. Zhang oversees the health and well-being of our crew members before, during, and after their space journeys. His expertise ensures that every traveler receives the highest quality medical care throughout their experience.

Anya Petrova
Head of Astronaut Training

A former astronaut with a deep understanding of human physiology and space psychology, Dr. Petrova leads our astronaut training program. Her expertise ensures that our crew members are physically and mentally prepared for the challenges and wonders of space travel.

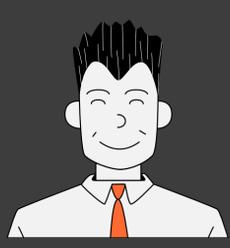

Maya Omar
Head of Robotics & AI

Renowned for her work in developing cutting-edge robots for space exploration, Dr. Omar leads a team of engineers and AI specialists. Their creations assist astronauts with tasks, conduct scientific research, and ensure the smooth operation of our spacecraft, allowing humans to focus on exploration and discovery.

Anika Kapoor
Head of Public Relations & Outreach

A passionate communicator with a knack for storytelling, Ms. Kapoor is responsible for sharing the excitement and wonder of space travel with the world. She leads our public relations efforts, educational programs, and community outreach initiatives.

Lucas Chen
Mission Control Director

A calm and collected veteran of numerous space missions, Mr. Chen is the mastermind behind our mission control operations. His expertise in flight dynamics, communication systems, and emergency procedures ensures the smooth and safe execution of every mission.

Adit Singh
Sustainability Officer

Passionate about protecting the environment and fostering responsible space exploration, Mr. Singh oversees Supernova Horizon's sustainability initiatives. He works with engineers to develop eco-friendly technologies, implements waste reduction programs, and advocates for responsible space practices within the industry. Through his efforts, Supernova strives to minimize its environmental impact while pushing the boundaries of space travel.

This is just a glimpse into the diverse and talented team that makes Supernova Horizon a leader in space tourism. Each member brings unique skills, expertise, and passion to the table, working in unison to make your spacefaring dreams a reality. So, when you embark on your journey with Supernova Horizon, know that you're in the hands of a dedicated team committed to making your space adventure an unforgettable experience.

Join the family

Supernova Horizon is more than just a space tourism company. We are a community of dreamers, explorers, and visionaries united by a shared passion for space exploration. By choosing Supernova Horizon, you become part of a movement that is pushing the boundaries of human achievement and opening up the wonders of space to a wider audience. Visit our website today to learn more about our upcoming missions and how you can join us on this incredible journey. Together, let's reach for the stars and redefine what it means to be human.
